Organizing Committee of the IIC 2016

As a global insurance industry organization comprised of senior insurance executives, international regulatory authorities and worldwide insurance scholars, the International Insurance Society (IIS) is pleased to endorse the Insurance Innovation Congress China 2016. Innovation is core to the future of the insurance industry not only in China, but also in the rest of the world.

The IIC 2016 will cover a wide range of important areas where innovation is critical, including risk and asset management, big data, product development and information technology. Innovation will play a crucial part in closing the current gap between demand and supply in the Chinese market.

The mission of the IIS is one of international collaboration. We bring together key decision makers from the insurance industry to combine their knowledge of regulatory issues, finance, and governance, utilizing world class research as a force to drive global industry growth and innovation, through our Thought Center, an online content library on key issues, as well as our annual Global Insurance Forum, which next year will take place in Singapore June 12 -15.

We are confident delegates will benefit greatly from the attending the Insurance Innovation Congress China 2016!

Yours sincerely,

Michael J. Morrissey
President and Chief Executive Officer
